-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Prosecution on the merits of this application is reopened on claims 1-68 considered unpatentable for the reasons indicated below:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 7, 8, 13, 14, 16, 17, 18, 21, 23, 27-32, 34-36, 39, 40, 42, 47-49, 51-53, 56, 58, and 62-67 are rejected under 35 U.S.C. 102(b) as being anticipated by Lhuisset (WO 009619930 A1).

Lhuisset discloses, *inter alia*, a brush having an operative portion consisting of a tube (6) split along at least one axis and containing at least one insert (8) surrounded by flexible filaments (9), i.e. "at least one bundle of bristles associated with the support (12, 13)...defining a first row of bristles extending substantially in a longitudinal direction, the bundle being split into at least two sub-bundles extending away from the end portion", held in place by means of a sleeve (10), and the free ends of the filaments project out of the slit (7) in the tube (6) to form the brush bristles (3). The brush enables the application of mascara onto eyelashes.

4. Claims 1-68 are rejected under 35 U.S.C. 102(b) as being anticipated by laia et al. (EPO 0458496 A1).

laia et al. disclose, *inter alia*, a cosmetic applicator is provided having a brush with radially adjustable length bristles. The applicator includes a brush head 1, a shaft 4 and a sleeve 6. The brush head 1 has an elongated brush stem 2, i.e. "at least one bundle of bristles", with a plurality of bristle tufts 3, i.e. "sub-bundles", circumferentially attached radiating outwardly therefrom. A plurality of slots 7 are provided in an end of the sleeve 6 through which the bristle tufts 3 are forced to protrude. The brush head 1 and shaft 4 to which the latter is attached are held within the sleeve 6. Upon rotation, the bristle tufts 3 can wind or unwind, depending upon direction of rotation, around the brush stem 2. In this manner, the effective outward radial length of each bristle tuft 3 can be rendered adjustable.

Conclusion

5. The remaining prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
